RESPONSE TO APPLICANT'S AMENDMENT

1. Applicant's amendment, filed 02/25/09 is acknowledged.

Claims 23, 58-66, 72 and 76 are pending.

Claims 23, 58-66, 72 and 76 drawn to a method for impairing cancerous progenitor cells in a patient comprising administering to said patient a composition comprising an antibody conjugated to cytotoxic agent, wherein said composition binds selectively to CD123 are under consideration in the instant application.

In view of the amendment, filed 02/25/09 the following rejection remains

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1644

3. Claims 23, 58-66, 72 and 76 stand rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No.6,733,743 for the same reasons set forth in the previous Office Action, mailed on 09/26/08.

Although the conflicting claims are not identical, they are not patentably distinct from each other because 1-6 of U.S. Patent No.6,733,743 recites a method of impairing a hematologic cancer progenitor cells that expresses CD123, comprising contacting said cells with a composition comprising an antibody and a cytotoxic agent, wherein said antibody binds selectively to CD123.

It is noted that applicant indicated that he will consider the filing of a terminal disclaimer.

4. No claim is allowed.
